

**Toshiba refreshes DVD and Combi Recorder range for 2010**

- Offers a choice of specifications across the range to suit every demand
  - Includes Freeview+ in all HDD recorders
- Available in a sleek, glossy black design which looks great in any home

**London, UK, 10<sup>th</sup> February 2010** – Toshiba UK today unveils its 2010 line-up of DVD recorders, with four new models introduced to ensure Toshiba has a recorder to match every consumer demand.

All models in the range are digital ready and include Freeview digital tuners - with Freeview+ available on HDD models - providing access to a wide range of TV channels straight out of the box<sup>1</sup>. 1080p upscaling capability across the range also delivers high-quality performance with standard definition DVDs, while the launch of a new VHS/DVD combi model is perfect for users who still own large video tape collections. Each model in the Recorder+ range features HDMI connectivity, an internal USB port and DivX codec support, allowing users to enjoy a wide variety of digital content including images, music and film.

**The ultimate in flexible viewing**

As well as recording to DVD, the top of the range Toshiba RD100KB and RDXV60K models feature integrated, high speed Hard Disk Drives (HDD) with 320GB of internal storage memory and offer Freeview+ to enable users to pause and rewind live TV. 'Series-link' capability makes it easier than ever for users to stay up-to-date with their favourite programmes.

The range offers total flexibility for users looking for one product that will work for everything - whether that's watching VHS tapes, viewing new digital content from DVD or USB, or using Freeview+ to record and watch television. The RDXV60K allows users to watch older material from VHS without having to transfer it to a DVD or buy it again, making it a fully adaptable recorder.

### Toshiba RD100KB

- DVD Recorder +320GB HDD
- 720p, 1080i, 1080p upscaling player
- HDMI
- Freeview+
- 1x Digital, 1x Analogue Tuner
