

**Comprehensive connectivity for mobile workers:
Introducing the Toshiba Dynadock V10**

- **Dynadock V10 expands connectivity options for laptop and netbook users via a single USB 2.0 port**
- **Smart, gloss black design is compact enough to fit on any desk or workspace**
 - **Enables high-definition content to be enjoyed on external monitors**

London, UK, 10th February 2010 – Toshiba UK today introduces the Dynadock V10 - a USB port replicator designed to enhance the connectivity of any laptop or netbook with a USB 2.0 port. Compact and ultra-portable, the Dynadock V10 offers a broad range of connectivity options and advanced video capabilities, including support for high-definition video transfer over USB.

The Dynadock is designed for users looking to expand their connectivity whilst working from a desk. As netbooks and ultraportable laptops traditionally compromise on connectivity for greater portability, the Dynadock V10 enables users to link to a number of devices and peripherals via a single laptop USB 2.0 port.

Keyboards and mice can easily connect to the Dynadock V10 with the four USB 2.0 ports, whilst peripherals such as mobile phones can charge even when the laptop is turned off or disconnected from the Dynadock using the Sleep-and-Charge USB port. The Dynadock V10 also allows users to quickly and easily connect to two additional monitors, whilst the high performance video controller, supporting both DVI-I video and VGA outputs, allows 1080p high definition content to be viewed on external monitors.

Completing the Dynadock's impressive connectivity options is an additional 10/100 Ethernet LAN port, headphone out, and microphone in for additional internet and audio functionality.

Sustainable and eco-friendly

As a responsible global corporate citizen, Toshiba ensures that the Dynadock V10 is RoHS- and WEEE-compliant, effectively reducing the environmental impact by restricting the use of lead, mercury and certain other hazardous substances and enhances recycling and recovery of materials.

The Dynadock V10 is priced at £94.00 inc VAT, and will be available from April 2010.
